Placenta Encapsulation

Maternal Placentophagy is defined as a mother's ingestion of her own placenta post partum at any time and in any form — to provide amazing benefits during the post partum period.

Encapsulation presents the placenta in a vegetable capsule for daily consumption. This can offer;

Increased energy and milk supply

Replenished iron stores

Balanced hormones

Reduced post partum bleeding

Decreased levels of baby blues and depression

Helps uterus to contract to pre-pregnancy size.

Pricing includes placenta collection and final order delivery within 24 to 36 hours[^].

Visit the website for more information.

*[^]Additional fees may apply for orders outside of the Gold Coast region.
Minimum turn-around time for tinctures is six weeks.*
